

Where are fill panels & fill blocks made?

Every panel and block we sell is manufactured at our California production facility. PLEASE NOTE: Fill panels and fill blocks are gas management tools. They do not generate compressed gas. A source of compressed gas is required to fill tanks. Nuvair fill panels (gas distribution panels) and fill blocks are used by dive shops worldwide.

What are the different types of dive panels?

Under the dive panels category, the product we offer includes a 2-diver portable panel, 3-diver air dive control panel, 3-diver mixed gas dive control panel, 3-diver nitrox dive control panel, portable air dive control, and more. The 2-diver portable panel is made up of stainless steel and comes with tungum parker fittings.

Are dive panels IMCA compliant?

IMCA Compliant: The dive panels we offer are IMCA compliant. So, you can rest assured about the reliability and safety of the equipment. Close Monitoring of Pressure: The 3-diver air dive control panel allows you to closely monitor and control the supply pressure of the diver.

What is a 3-diver mixed gas dive control panel?

The 3-diver mixed gas dive control panel enables the diving supervisor to control the secondary and primary air supply to each of the divers. It helps in monitoring the exact dive time and depth of each diver. All our diving life support products are ideal for commercial diving operations.
