

What is a smart street solar bin?

The smart street Solar Bin is the solution to the current state of municipality waste collection system.

What types of waste streams are available in BigBelly bins?

Our fully-enclosed better bins are available in five different waste streams: waste, single-stream recycling, paper, bottles and cans, and organics including smart compost. Bigbelly bins can be configured as standalone bins or as multi-stream kiosks to accommodate each space's waste stream needs.

What is the largest solar compacting bin?

The WasteMate 240 is the largest solar compacting bin. It's a smart waste bin with a built-in press and is powered completely self-sufficiently through a solar panel on top. The WasteMate Basic is a non-compacting waste bin with a standard wheelie bin of 120 litres. This bin is designed to collect specific types of waste, like glass or paper.

What are the best solar compacting smart waste bins?

The WasteMate 120 is the showpiece among the solar compacting smart waste bins. The bin has a built-in press and a solar panel on top. The WasteMate 160 is a compact, smart and durable solar compacting bin. It has a built-in press and works completely independently thanks to the solar panel on the top.
