What is a NEMA battery enclosure?

DDB's NEMA battery enclosures are engineered for superior protection in harsh environments, ensuring durability and security for critical battery systems.

How many batteries does a battery enclosure take?

Create battery- powered, hand-held devices such as card and signal readers-- these enclosures have a clear cover for checking screens and status lights inside. They take one 9V battery(not included). The battery slots in without opening the entire enclosure, which is convenient for devices that run through batteries quickly.

What is a 9 volt battery?

A 9 -volt battery fits inside a compartment in these enclosures to power testing devices and other hand-held instruments. Protective boots prevent damage to the enclosure and make it easy to grip. They have a built-in stand to keep the enclosure upright. For technical drawings and 3-D models, click on a part number. Ht. Wd. Dp. Ht. Wd.
