

## 36 Gallon industrial storage server data rack with matching battery

What is a lithium server rack battery?

Lithium server rack batteries offer improved performance, longer lifespan, and greater efficiency compared to traditional lead-acid batteries, making them a popular choice for businesses and organizations that require reliable backup power for their critical equipment. What is Applications Lithium Server Rack Battery used for?

What is a 48V 100Ah server rack battery?

With a 48V 100Ah capacity, it's perfect for ensuring uninterrupted power supply during outages, making it ideal for setups with specific server rack power requirements. This server rack battery has a built-in Battery Management System (BMS) that monitors voltage, current, temperature, and battery health.

What is a server rack battery?

Built-in 100A BMS, 3000+ cycle life (80% DoD), Grade A Cells. What is Server Rack Battery? Server rack battery is a backup power supply that is specifically designed to be installed in a server rack. It provides uninterrupted power to servers and other critical equipment in the event of a power outage or other power-related problems.

What voltages can a server rack battery support?

The kit allows for flexible voltage configurations such as server rack battery 12V or 24V, depending on your needs. The BMS continually monitors each cell to optimize performance, extend battery life, and protect against any electrical issues. Huge 30 kWh capacity supports large data centers or industrial server rooms with high power demands.
