

What is a power supply kiosk?

Power supply kiosks form a part of the Ritherdon range of Feeder Pillars. A power supply kiosk is a robust, weatherproof enclosure which can be either permanent or temporary in type. They are much faster to install than a brick built construction while being much more damage resistant than a plastic type enclosure.

What equipment is inside a power supply kiosk?

The equipment typically housed inside of a power supply kiosk includes the Distribution Network Operator's (DNO's) "service head" or cut out and, for larger supplies, the CT chamber. The permanent power supply kiosk has a separate compartment for this and another compartment for equipment such as the meter and the distribution board.

What is a Ritherdon power supply kiosk?

Ritherdon power supply kiosks are manufactured to ENW specification as standard. The equipment typically housed inside of a power supply kiosk includes the Distribution Network Operator's (DNO's) "service head" or cut out and, for larger supplies, the CT chamber.

How big should a ps60 kiosk be?

A PS60 kiosk would be large enough for a <100 amp supply. Each compartment has its own door so that they are completely segregated. The enclosure has (removable) lifting lugs on the outside so that it can be easily and safely delivered and installed on site.
