

What are the requirements for battery cell housings?

Battery cell housings must meet a wide range of demanding requirements - including the highest standards for sealing, electrical conductivity, mechanical stability, and safety. At the same time, they must be produced flexibly and in large quantities to meet the increasing market demands.

What is a battery housing?

The battery housing is the central safety component that must meet the highest standards in terms of sealing, electrical conductivity, mechanical strength, and much more. It essentially consists of a battery lid / cap and a battery can - including the critical interface between these two components.

How to develop a battery cell housing?

There are no standard solutions for the development and production of battery cell housings. Therefore, it is crucial to have a flexible partner with the expertise and competence to cover the entire process, from development to production.

What size is a battery cover?

Suitable to be installed into enclosures with material thickness of 1.0mm to 3.5mm. Cover can be opened/closed without any tool for easy battery replacement. [LINE-UP] 5 different battery ...
