

What is a rackmount adjustable angle bracket?

The Rackmount Adjustable Angle Bracket (RAAB) accommodates the weight of heavy equipment that isn't installed on a rack. The RAAB, which comes in two depth ranges, can support up to 200 lbs and vary from 24 to 48 inches deep. Constructed in 16-gauge steel. Angles mount to 19" , 23" , or 24" EIA rack mounting rails.

What is the difference between rackmount angle brackets and reducer brackets?

Problem Solved. Rackmount angle brackets are used when equipment mounted to the front rails needs additional weight support while reducer brackets offer greater versatility for 23" or 24" wide racks when you need to mount 19" wide servers or equipment.

How do proline G2 rack angles Mount?

The ProLine G2 Rack Angles mount using BV-M6 fasteners instead of the traditional cage nut and screw combination.
