

Can a 1609-d be used with an external battery unit?

Connect any additional optional accessories (1609-ENET card). The 1609-D can be used with the External Battery Unit (1609-EXBAT). The 1609-EXBAT is designed to mount to a heavy duty din-rail (see Diagram 3) or the optional mounting bracket assembly (1609-BRK) which will allow it to mount to either the panel or floor (see Diagram 4).

How do I install the 1609-exbat?

To install the 1609-EXBAT with the 1609-D UPS, connect the three 10 AWG wires from the 1609-EXBAT terminals to the 1609-D terminals marked as 'EXTERNAL BATT PACK (36V)' (see Diagram 2). Dispose of used batteries according to the battery instructions.

What is the maximum temperature a 1609 HBAT can run?

The maximum ambient temperature is 40 degree Celsius using the 1609-SBAT or 50 degree Celsius using the 1609-HBAT. The maximum humidity specification is 95% RH (Non-condensing). Only use battery wires that have been provided with the UPS.

How do you connect a battery to a car battery container?

Place the battery container and batteries onto a flat surface. Use the provided jumper wires to connect the batteries in series. Connect the positive terminal (red) of the battery to the negative terminal (black) of another battery. See photo below for details. 4. 5.
