

Best ip55 network enclosure for ip65 waterproof unit

Is IP55 waterproof?

Since regulators hold manufacturers to such rigorous standards, most businesses want to maintain at least an IP55 rating. This rating has limited protection from dust and water, making it an option for indoor and outdoor uses. However, products with an IP55 rating are not waterproof. What Is IP65?

Why do you need an IP65 rating for your outdoor electrical enclosure?

Regular inspections help you avoid unexpected failures due to water or dust ingress. You get strong protection when you choose the ip65 rating for your outdoor electrical enclosure. The ip65 rating means your equipment receives complete protection against dust and oil.

Why should you choose an outdoor electrical enclosure with an IP55 rating?

When you choose an outdoor electrical enclosure with an ip55 rating, you get a solid balance between protection against dust and water. The ip55 rating means your equipment receives almost complete protection from dirt, dust, oil, and other non-corrosive materials. You also gain complete protection from contact with the enclosed equipment.

Why are IP55 enclosures more expensive than IP65 enclosures?

Higher protection levels often mean higher prices. IP55 enclosures cost less because they offer basic protection. IP65 enclosures cost more due to better dust and water resistance. IP66 enclosures have the highest price because they provide the strongest protection. IP55: Budget-friendly for simple outdoor setups.
