

How long does it take to build an ammo rack?

The total time to build the ammo storage rack is about six hours. This design is built around the ACR4-18 Ammo Crate manufactured by MTM Case-Gard.

What is the footprint of the ammo rack?

This instructable will show you how to put together a sturdy, easy to build rack that holds six ammo storage crates, capable of holding from 1,500 (shotgun) to 10,000+(pistol) rounds of ammunition in a footprint 48" high, 12" wide, and 20" deep.

How much does it cost to make an ammo rack?

The cost of materials for the ammo rack itself is just over \$50. Six of the recommended ammo crates will run you another \$72-\$90. To give you an idea, an equivalent volume of storage using milspec metal ammo cans would cost at least \$30-\$60 dollars more, and you wouldn't have a rack to store them in.

How many ammo crates can this rack hold?

This instructable shows you how to build a sturdy rack that holds six ammo storage crates. Each crate can hold from 1,500 (shotgun) to 10,000+(pistol) rounds of ammunition.
