

Is steam cleaning right for You?

Steam cleaning is an effective and eco-friendly way to clean various surfaces in your home or business. Whether steam cleaning is right for you depends on the surfaces you need to clean, the features you want from a cleaner, and whether it's safe for you.

How do you maintain a steam cleaner?

Maintain the steam cleaner. After every use, make sure to empty the water container, rinse it out, clean the attachment, and wipe down the steam cleaner from the outside. This will ensure there are no blockages and that all dirt has been removed to allow the steam cleaner to function as intended. Be careful.

Should you buy a portable steam cleaner?

Because steam has such small vapor molecules, it's able to penetrate a surface's pores for a deep-down clean. Portable steam cleaners and steam mops are ideal for home use, says Natalie Shifrin, Owner of NY Steam Clean. "Look for lightweight, easy-to-use models with adjustable steam settings," she says.
