

Can you convert old station draws to soft close

How much does it cost to convert drawers to soft close?

The cost of converting your drawers to soft close depends on the size and quantity of your drawers, as well as the type of soft close slides that you choose. On average, the cost of retrofitting soft close slides onto your existing drawers ranges from \$30 to \$50 per drawer.

How to make kitchen drawers soft close?

If you are skilled with DIY projects, you can make your kitchen drawers soft close by adding dampers to the drawer slides. You will need to purchase soft close dampers and attach them to the slides, which will require some drilling and screwing. Another DIY method for making kitchen drawers soft close is to add felt pads to the drawer slides.

How does a soft close drawer work?

Soft close drawers work through compression mechanisms and springs that will catch a drawer in its last 1-2% of travel. By closing the drawer with a reasonable force, the slide will catch the moving drawer and slowly pull it shut - thus preventing the slam familiar with slides. Is a soft close drawer adapter the same as a soft close drawer damper?

How do I replace soft close slides?

Remove the existing drawer slides from the drawer and the cabinet. Install the new soft close slides onto the cabinet and the drawer. Attach the dampers to the new slides. Test the soft close mechanism to ensure it is working correctly.
