

Can you move a electricity housing with electricitys in it

How to move a house electricity connection hassle-free?

Planning is the key to moving the house electricity connection hassle-free. Before leaving your current home, make sure your provider knows you're moving and that final usage is properly recorded. These steps help you avoid billing disputes and ensure the next occupant starts with a clean slate.

Do you need a new energy plan when moving houses?

Moving houses can represent a fresh start, and you might even find that changing to a new energy plan is more suitable for your new house and energy usage. To help ensure a smooth transition when moving homes, here are a few extra tips for organising your utilities:

Do I need to disconnect electricity when moving house?

To get electricity when moving house, contact your current provider to disconnect your old address and arrange connection at the new one first. Then, compare energy plans to choose the best deal for your needs. Most importantly, schedule the electricity connection a few days in advance. Do I need to disconnect the electricity when I move out?

Should I switch to a cheaper energy supplier when moving house?

While you'll want to take over the existing utilities when moving house, that doesn't mean you can't shop around for a cheaper or better supplier to switch to. Don't assume the previous owner did their research and was on the best deal. Use our handy tool to instantly compare energy suppliers to check what's available for you.
