

How do you store and transport tubing & casing couplings?

When storing and transporting tubing and casing couplings, it's important to establish a systematic storage strategy. This helps ensure that the parts are easy to locate when needed, and also reduces the risk of them being damaged in transport or mishandled during use. One key element of an effective storage system is labeling each part correctly.

What are the space requirements for casing?

In determining space requirements for casing, the following points are to be considered: working space. In accordance with API Recommended Practice RP 5C1 (Section 3), the height of the stack should not exceed 10 ft (3 m) including the pipe rack.

Do notch-sensitive casings need to be coated?

Particular care is required to prevent the corrosion of notch-sensitive casing such as C95 and P110. If storage for more than three months is foreseen, unless adequately coated when delivered, casing of these grades should be cleaned and coated internally and externally.

Can a tubular casing be re-coated before storage?

If casing is to remain in storage for a long period, the mill coating could be supplemented or the casing completely cleaned from the mill coat and re-coated. The internal and external surfaces of production tubulars may be grit blasted and then re-coated prior to storage.

Wondering if resin goes bad? Discover how to tell if your resin has expired, proper storage tips, and how to extend its shelf life for the best results. Keep your resin projects flawless with our expert advice.

FBO engaged in the business of storage and Transportation will have to follow at least the minimum GMP/GHP requirements identified and documented basis the above mentioned criteria depending on ...

The document summarizes presentations that were part of the CCS Speed Dating event on February 8. It lists 14 presenters from research institutions in Norway including SINTEF, the Norwegian ...

Due to factors such as selection, quality, transportation, storage, and use, casing damage occurs from time to time, resulting in production reduction or even scrapping of oil and gas wells, which brings ...

In the process or manufacturing industry, raw materials and products need to be transported from one manufacturing stage to another. Material handling equipment In today's fierce competitive global ...

By paying attention to environmental conditions, choosing the right storage location, handling and stacking them correctly, and providing protection and maintenance, you can ensure that your casing ...

ToR established in early 2010 WIF's TERMS OF REFERENCE for Sustained Casing Pressure Purpose: Sustained casing pressure as a well integrity challenge has received increased attention the last ...

According to SY/T6194-96, domestic casing should be bundled with steel wire or steel belt. A protective ring should be screwed on the exposed portion of each casing and coupling thread ...

The purpose of this quality requirements specification (QRS) is to specify quality management requirements and the proposed extent of purchaser intervention activities for the procurement of ...

tted lift-able thread protectors installed. For all steel grades: stack pipe on wooden or plastic batons and avoid contact between pipe bodies by aligning at least three rows of wooden spacers perpendicular ...

In this article, we will explore some of the key considerations that should be made when handling tubing and casing couplings in order to ensure their long-term integrity.

With Rhino Tubular Handling Systems, you can prevent metal-to-metal contact for all your tubing, casing, and drill pipes. The system provides for easy stacking and securing of the sections while ...

Saudi Arabia Metal Lithium Li Based Battery Casing Market valued at USD 780 Mn, driven by EV adoption, renewable energy storage, and lithium investments for durable casings.

Proper storage of oil casing is crucial to ensure its integrity and readiness for use. we will discuss various storage methods and techniques to help maintain the quality and safety of oil casing.
