

What are the specifications for the 3040 40U cabinet?

The cabinet includes the following specifications for power and heat dissipation. The 3040 40U cabinet is rated at 200 VAC to 240 VAC at 50 Hz to 60 Hz, and operates to ±10 percent of that range. The cabinet includes two identical AC power distribution units (PDUs), with each PDU providing up to 72A of usable power.

How many trays can be installed in a 3040 40U cabinet?

The maximum number of trays that you can install in a 3040 40U cabinet depends on the height of each tray in rack units (U). Each rack unit is 1.75 inches (4.45 cm). For example, you can install up to ten 4U trays, up to twenty 2U trays, or a combination of 2U and 4U trays, up to 40U.

How much does a 40u-p cabinet weigh?

The 40U-P weighs 198 KG(435); a cabinet fully configured with EMC products can weigh approximately 1,182 kg (2600 pounds). Make sure your flooring can safely support your configuration.

How many PDUs are in a power cabinet?

The cabinet includes two identical AC power distribution units (PDUs), with each PDU providing up to 72A of usable power. The PDUs are mounted vertically at the back of the cabinet, and each PDU includes six 12A power banks. Each power bank contains four IEC 60320-C19 power outlets and a 15A circuit breaker.

Divided into equipment power zones, battery zones, and air conditioning zones, with front-opening doors. The cabinet's overall structure can be assembled, addressing on-site transportation issues ...
