

What is a power supply kiosk?

Power supply kiosks form a part of the Ritherdon range of Feeder Pillars. A power supply kiosk is a robust, weatherproof enclosure which can be either permanent or temporary in type. They are much faster to install than a brick built construction while being much more damage resistant than a plastic type enclosure.

What are electrical kiosks?

Complex electrical applications require separate stand-alone systems that will operate under harsh circumstances. Such complete constructions are known as electrical kiosks. Due to the wide range of applications where such kiosks might be used, we've decided to gather all such info in one comprehensive guide.

What is a PS300 power supply kiosk?

Give us a call on 0191 4104292 or email us to discuss a power supply kiosk manufactured to your specific requirements. PS300 power supply kiosks are two compartment enclosures designed specifically for permanent electrical connections, typically up to, but not limited to, 430 Amp\*.

What equipment is inside a power supply kiosk?

The equipment typically housed inside of a power supply kiosk includes the Distribution Network Operator's (DNO's) "service head" or cut out and, for larger supplies, the CT chamber. The permanent power supply kiosk has a separate compartment for this and another compartment for equipment such as the meter and the distribution board.
