

Electricity station hanging folder IP55 IP65

How do IP55 & IP65 enclosures compare?

Here is a table that shows how IP55, IP65, and IP66 compare: IP55 enclosures protect against dust that could interfere with normal operation and can handle water jets from any angle. IP65 enclosures are fully dust-tight and shield your equipment from low-pressure water jets.

What is an IP55 enclosure?

What this means in real life: IP55 enclosures are great for indoor and light outdoor environments where occasional dust and water exposure are expected, but nothing extreme. Think workshops, HVAC systems, or sheltered outdoor panels. ? Dust can enter in small amounts, but won't affect performance.

Why do you need an IP65 rating for your outdoor electrical enclosure?

Regular inspections help you avoid unexpected failures due to water or dust ingress. You get strong protection when you choose the ip65 rating for your outdoor electrical enclosure. The ip65 rating means your equipment receives complete protection against dust and oil.

What is an IP65 enclosure?

IP65 enclosures offer stronger protection and are built for tougher environments. They're completely sealed from dust and can withstand high-pressure water jets, making them a reliable option for both outdoor and industrial settings. Common use cases:

Upgrade your indoor electrical distribution system with our Indoor/Outdoor Distribution Box - where compact design, versatility, and ease of installation converge for efficient and secure power ...
