

Why do batteries need an IP rating?

IP ratings benefit batteries in many fields. They keep batteries reliable in the sea, on building sites, for fun in the sun, and in high-tech health gear. IP ratings keep lithium batteries going strong wherever they're used. A high IP rating shields your battery against dust and solids. This defense is key since dust can harm the battery over time.

Are IP65 batteries better than IP67 batteries?

IP65 batteries are better, keeping dust out and handling water splashes. IP67 batteries are the strongest, protecting against dust and diving into water safely. Choosing the best IP rating depends on the application and environment. The IP rating system helps us know how well a lithium battery protects against water and solids.

Are IP54 batteries waterproof?

IP54 batteries are decent with dust but not fully waterproof. IP65 batteries are better, keeping dust out and handling water splashes. IP67 batteries are the strongest, protecting against dust and diving into water safely. Choosing the best IP rating depends on the application and environment.

Does a battery pack need a high IP rating?

In general, a battery pack used indoors, maybe in a factory environment would not require a high IP rating, whereas a battery pack used in an outdoor or harsh environment may require a higher IP rating.
