

What types of AC units are suitable for metal buildings?

There are four primary AC unit types suitable for metal buildings: mini split/ductless, packaged terminal air conditioners (PTAC), central split systems, and evaporative coolers. Each system has unique benefits depending on building size, usage, and budget.

How do I Choose an air conditioning system for a metal building?

The choice of an air conditioning system for a metal building should be both a science and an art, weaving together the building's specifics with the technicalities of HVAC systems. An effective, energy-efficient, and high-performing cooling solution hinges on the right choice of air conditioning system.

What is a TCW rooftop air conditioning unit?

The TCW series of rooftop air conditioning units are designed to be the most efficient, quickest to install, easiest to service, and most reliable units in the industry-while still maintaining an affordable price. This platform provides you with a full line of nominal capacities from 100 to 300 MBH.

What is a portable air conditioner?

The external unit, a.k.a. the condenser unit, is usually installed outdoors, where its main function is to blow warm air out of the house or building. Just like the name implies, a portable air conditioner is designed to be movable from one room to another, thanks to a set of caster wheels on the bottom.

Built on Willis Carrier's invention of modern air conditioning in 1902, Carrier is a world leader in heating, air conditioning and refrigeration solutions. We constantly build upon our history of proven innovation ...

Aero designs and builds all of its industrial air conditioners specifically for harsh and severe conditions. As a result, all units have several features to make them more reliable and durable than light ...

Units with stainless steel internal surface are "ideal for clean rooms, hospital surgical theatres, food, pharmaceuticals and chemical industries. Double-sided stainless steel panels are most suitable for h ...

Rittal enclosure air conditioners supply an industry-leading climate control solution. The sophisticated design of these cooling units provides cooling output that ...

Available in a variety of capacity and design combinations, the Series is ideal for creating a "best match" system for your air conditioning requirements. Inverter-based units promise industry-leading quiet ...

Using a combination of robotic arms and smart air conditioner disassembly machine tooling, the system removes components with surgical precision. Special attention is paid to fragile ...
