

What is a battery housing?

The battery housing is the central safety component that must meet the highest standards in terms of sealing, electrical conductivity, mechanical strength, and much more. It essentially consists of a battery lid /cap and a battery can - including the critical interface between these two components.

How did GF Casting Solutions contribute to the development of a battery housing?

GF Casting Solutions contributed to the development of this aluminum battery housing for Renault's electric vehicle in many ways: from component development, design and optimization, prototyping, process development for casting and assembly, to various tests and simulations.

How to develop a battery cell housing?

There are no standard solutions for the development and production of battery cell housings. Therefore, it is crucial to have a flexible partner with the expertise and competence to cover the entire process, from development to production.

The battery housing is the central safety component that must meet the highest standards in terms of sealing, electrical conductivity, mechanical strength, and much more.

Netflix put fans of the hit sitcom *Young Sheldon* at ease when the streaming giant announced the seventh and final season will drop on the platform on April 15.
