

What is a metal building home?

Metal Building Homes are now at the forefront of innovative home technologies. Metal building manufacturers have sprung up offering a wide array of metal home kits and custom floor plan options to the everyday consumer. Each month we are inspired by the new projects brought to life by these skilled architects and contractors.

Are all metal building homes the same?

While there are no two metal homes the same, here are some of our most popular metal building home sizes that we offer. We can also customize a metal home kit or erect your steel home as a turnkey construction project. Ready to buy a Metal Building Home? Let us work with you to design a large spacious home for your family.

Are metal building homes a cost-effective choice?

These homes stand out for their notable savings in construction costs, making them a cost-effective choice. The trend towards metal building homes is on the rise, with construction data revealing a 15% uptick in preference over traditional home construction.

Are metal buildings the future of residential construction?

From tiny homes to modular prefabs, the use of steel buildings is wide spread in modern residential construction. Custom metal buildings are moving in the same direction by making use of containers into the building package. The demand for residential metal building houses continues to grow as we learn how energy-efficient & durable metal is.
