

Fups casing double door solar battery charlesotn sc

What is a good APR for a solar loan in Charleston?

Recent interest rate hikes have bumped solar loan APRs above 5.99%, but we have seen some providers offer as low as 30-year, 3.99% loans. Getting quotes from different installers is essential to getting the best rates possible in Charleston.

How much does solar cost in Charleston?

The average price of solar is about \$2.1 to \$3.14 per watt in Charleston, so anything in that range is a fair price. Some prices may be too good to be true. If your installer quotes you way below the average price in your area, proceed with caution. Installers must charge fair prices to remain in business and provide you with 25 years of support.

Are solar incentives a good idea in Charleston?

Solar incentives and rebates can cut the cost of installing solar in Charleston by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.
