

What is a network rack & cabinet?

Network Racks and Cabinets are essential for any network. Cabinets are used for storing routers, patch panels, switches and a wide variety of networking equipment and accessories. Network cabinets support large, modular network switches by providing additional space for cable management and side-to-side airflow solutions.

What are equipment racks & cabinets made of?

Made from welded steel or aluminum, and coming in many stocked sizes and styles, our selection of equipment racks and cabinets will help protect and simplify the integration of your project. Designed for maximum airflow and easy installation, our racks and cabinets help your equipment run reliably for their full-service life.

What accessories are included in a networking rack?

Because networking involves so many cables, many racks have cable organizers. Other accessories include chassis, shelves, power strips, fan trays, and doors. Besides networking and communications equipment, audio visual (AV) equipment, scientific instruments, and test systems are also rack mounted.

What is an equipment rack for networking equipment?

An equipment rack for networking equipment is a frame to which patch panels, switches, routers, and small servers may be mounted. The width of the rack and the mounting holes conform to industry standards. Both two-post and four-post racks are used. Open frame equipment racks may be seen in IT rooms and networking closets.
