

High quality flat pack industrial battery storage data rack

What is an industrial battery rack?

Industrial battery racks are structures designed to hold and support batteries in a safe and organized manner. These racks can accommodate various battery types, including lead-acid, lithium-ion, and nickel-cadmium batteries, and are crucial for applications requiring reliable energy storage solutions. Overview of Key Specifications

What types of battery racks do you offer?

We offer a wide range of battery racks, including seismic-rated, modular, adjustable, and custom-designed racks for both VRLA and flooded battery systems. Our racks are engineered to support reliable performance in utility, telecom, data center, and industrial environments.

What are the different types of industrial battery racking systems?

Various types of industrial battery racking systems cater to different needs: Standard Battery Racks: Suitable for general applications with various configurations. Seismic-Rated Racks: Designed to withstand earthquakes, ensuring safety in seismic-prone areas.

What is a great battery rack?

When used in AGreatE's BESS systems (64 kWh to 138 kWh with a rated voltage of 358 V to 768 V) these Battery Racks can be stacked limitlessly to create the specific storage size your project needs. The difference is clear, get better results with the ATEN Pack and Rack system.

ATEN Battery Racks are a reliable, long cycle life, modular, and scalable lithium iron phosphate (LFP) battery energy storage system (BESS) building block for commercial and industrial applications.
