

What is the length of a casing?

Casings may be 5.5 m to 6.0 m long, but smaller lengths are also available. Lengths of about 2.5 m to 3.0 m are convenient for handling. There are two grooves in each casing.

What size casing do I Need?

Casing generally used for installation is about 44 mm wide and 16 mm in thickness (height). However, for cables of higher sizes, 80-100 mm wide and proportionally higher in thickness casings are also in use. Casings may be 5.5 m to 6.0 m long, but smaller lengths are also available. Lengths of about 2.5 m to 3.0 m are convenient for handling.

What is the length of a well casing?

Its length is not more than 50 feet. **Surface Casing** This extends up to 2,000 feet long and has a smaller diameter compared to conductor casing. Its function is to keep the water deposits from being contaminated by the presence of salt water or hydrocarbons below the surface. **Intermediate Casing** This is where the longest section is found in a well.

How to choose a cable casing?

In case the cable has a large cross-section or a number of cables are to be drawn, the size of casing should increase accordingly. At the time of wiring the cables laid in the grooves are covered by a very thin and long strip of wood which is as wide as the casing. This is known as capping. The thickness of capping should be about 7 mm.

So you started putting skip buttons into ads that long or limiting ads to 6 to 15 seconds, which was perfectly acceptable. Then you started forcing double 6 second ads. Which was annoying but still ok ...
