

What is a slide-in Battery Mount?

Slide-in mounts are arguably the most common type of battery connection/terminal setup, requiring the user simply to 'drop' the cells into place either lengthways or side-on, at which point they're either held in place by opposing forces from the two terminals, or secured with a cover or cap

How much weight can a bottom mount slide hold?

Bottom Mount slides have capacities up to 1,200 lbs. each. They are constructed of heavy gauge, cold-rolled or stainless steel, and feature stainless steel rollers. Heavy duty and space saving, these slides can be coated with our Poxylube dry film lubricant, E-coated, or plated.

What are battery holder mounts?

Battery holder mounts and battery mounts are usually present as an integral part of a complete holder unit, but you can also buy battery mounts cheaply as swap-out or replacement parts. They can come in many different configurations and designs, with some of the more common types being:

What is a chassis mount battery holder?

Chassis mount battery holders can be either metal or plastic, open faced or enclosed (i.e. with or without a cover), and are commonly designed to accept a wide range of cell sizes including AA, AAA, C, D and 9V PP3
