How tall is a 2U server?

One rack unit equals 1.75 inches (44.45 mm). This means a 2U server is 3.5 inches tall, a 4U device is 7 inches tall, and so on. The "U" standard makes it easy to calculate how many pieces of equipment will fit in a rack and helps maintain consistency across different brands and models.

How tall is a 1U front panel?

Thus, a 1U front panel would be inches (1.719 in; 43.66 mm) tall. If n is number of rack units, the ideal formula for panel height is $h = 1.750n - 0.031$ for calculating in inches, and $h = 44.45n - 0.79$ for calculating in millimetres. Manufacturing allows for dimensions with less precision.
