

What is a computer room air conditioner (CRAC)?

Computer room air conditioners (CRAC) provide the high-capacity cooling these facilities require. Proper maintenance keeps CRAC units running efficiently to ensure ideal temperatures for IT infrastructure. How CRAC Units Work? Computer room air conditioners contain components specialized for data center environments:

Why do data centers need a computer room air conditioner?

The continuous operation of data centers depends on maintaining a cool, consistent climate for the sensitive computer equipment inside. Computer room air conditioners (CRAC) provide the high-capacity cooling these facilities require. Proper maintenance keeps CRAC units running efficiently to ensure ideal temperatures for IT infrastructure.

How to maintain a CRAC air conditioner?

This could improve cooling efficiency and reduce wear on the air conditioners. The most important maintenance task for any CRAC unit is filter replacement. Dirty filters overwork the motors and also reduce cooling capacity. If filters are getting dirtier than they should between changes, it would be wise to look for the source of the problem.

How do you know if your computer room air conditioning system is failing?

If you think your Computer Room Air Conditioning system is headed for failure, recognizing the signs beforehand can save your business from significant disruptions. Some common indicators include: Temperature Fluctuations- If your data center experiences sudden changes in temperature, it could be a sign that your CRAC system is struggling.

One option is a ceiling- or wall-mount air conditioning unit positioned such that chilled air blows directly into the equipment intakes. Another alternative is in-rack cooling, which cools ...

These air-conditioned rack enclosures are made to order and can be customized to meet your specific needs. For more information about our air-conditioned server cabinets, rack mount AC units, server ...

We are setting up a new rack of servers in a storage room within our office. We are going to keep the air conditioning at a very low temperature and the air will be pouring in from a vent ...
