

How to show a station in battery elevation

How do I get a station & elevation?

You can access it via the Analyze tab, but for our purpose, we still access it via the Profile View Ribbon context menu after clicking on a Profile View. Then, in the dialog box, click on the button beside Point 1, and select the point for which you want to get the station and elevation, as shown above.

Do station elevation and depth labels need to be manually adjusted?

This means that if changes are made to the objects within the profile view, the labels will not dynamically update and will need to be manually adjusted. Both station elevation and depth labels provide valuable insights into a design, but require careful and accurate placement within the profile view window.

Can a band show elevations from 2 profiles & stationing?

This type of band can show elevations from 2 profiles and stationing. The band style has separate label components for use at Major and Minor stations. The label for Major stations will have 3 components, 1 for each profile elevation and one for stationing. The label for Minor station will only have the 2, 1 for each profile elevation.

How do I get the elevation?

Another way to get the Elevation is to use the Inquiry Tools. You can access it via the Analyze tab, but for our purpose, we still access it via the Profile View Ribbon context menu after clicking on a Profile View.
