

What is an industrial enclosure?

Enclosures may come in standardized dimensions or shapes which can be stacked for assembly, or they can be custom built to particular specifications. The amount of protection and durability an enclosure offers depends largely on its material composition. Most industrial enclosures are made from materials classified as either metals or polymers.

What makes a good industrial enclosure?

The amount of protection and durability an enclosure offers depends largely on its material composition. Most industrial enclosures are made from materials classified as either metals or polymers. Metals generally exhibit higher conductivity to both heat and electricity than other material types.

Why do manufacturers need industrial enclosures?

Whether you're in the automotive, food and beverage, or retail and logistics industry, manufacturers need industrial enclosures of all sizes and materials that help promote versatility in configuration and assembly as well as durability in protecting sensitive electronics within the enclosure.

What are the different types of industrial enclosures?

There are many types of industrial enclosures that vary based on size, rating, material, and what they are designed to encapsulate. Console enclosures are freestanding and have a sloped front or top for mounting control components.
