

Industrial storage self-cooling unit for sale

What is a self-contained refrigeration system?

Our self-contained refrigeration systems combine evaporator and condensing unit into one. There is no need for refrigerant charge saving you time, money and energy.

What are the main refrigerants used in cooling systems?

Main refrigerants used in cooling systems are Freon, Ammonia, Carbon dioxide, Glycol and Propane. CANTEK can produce all cooling solutions as single or double stage (Cascade system) by using one or two of these refrigerants depending on the processes of the refrigeration industry.

What is a self-cooling rack?

Self-cooling racks provide closed-loop precision cooling to help prevent mission-critical equipment in the rack from overheating. They are ideal for micro data centers or single-rack installations, particularly at the edge of a network. The warranty on this product has expired. If you need assistance, please contact us. Need help with your purchase?

What are AmeriCool AC units used for?

AmeriCool AC units are ideal for industrial applications and provide effective cooling solutions for factories, warehouses, workshops, and various other workplaces that can be harsh environments for employees. These AC units also provide ideal cooling solutions for use on assembly lines, manufacturing plants, process cooling, and warehouses.
