

What is a smartshunt IP65 battery monitor?

2.1. The battery monitor The SmartShunt IP65 is a battery monitor. It measures battery voltage and current. Based on these measurements, it calculates the battery's state of charge and the time to go. It also keeps track of historical data, such as deepest discharge, average discharge and the number of charge and discharge cycles.

What is the voltage range of smartshunt IP65 500A?

Technical data SmartShunt IP65 500A Supply voltage range 6.5 - 70 Vdc Current draw < 1mA Input voltage range, auxiliary battery 6.5 - 70 Vdc Battery capacity (Ah) 1 - 9999 Ah Operating temperature range -40 +50°C (-40 - 120°F) Page 45 Manual - SmartShunt IP65 **The very first production batch (50 pcs) has a 30 cm VE. Direct cable.

The Protection of Personal Information Act (POPIA) has set a new standard for data protection in South Africa, aligning it with global privacy regulations like GDPR.

The main function of the battery monitor is to follow and indicate the state of charge of a battery, to be able to know how much charge the battery contains and to prevent an unexpected total discharge.
