

What is a knob backplate?

A backplate is a decorative plate that covers up holes and damage on doors or other surfaces. Our knob backplates are available in a variety of finishes including light bronze, polished chrome, Venetian bronze, and satin nickel so you can find a finish you love.

What is a cabinet backplate?

A cabinet backplate is installed flush against the cabinet door beneath the escutcheon of the knob or pull. It is used in conjunction with a knob or pull to add a little extra interest and detail to the cabinet, or to camouflage existing holes.

Where can I find cabinet hardware backplates?

Welcome to the "Cabinet Hardware Backplates" page on MyKnobs.com, your ultimate destination for all your cabinet backplate needs. Here, you'll find a vast selection of backplates in various styles, materials, and finishes, allowing you to discover the perfect match to complement your cabinet knobs and pulls.

What finishes do the knob backplates come in?

The knob backplates come in various finishes including light bronze, polished chrome, Venetian bronze, satin nickel, and more. You can find a finish you love by choosing from our selection. If you are looking to match the finish to your cabinet knob's finish, be sure to choose the same manufacturer.
