

Are aluminium casement windows secure?

Aluminium casement windows offer advanced security features, including multi-point locking systems. These systems utilize multiple locking points along the window frame, providing enhanced protection against forced entry. Reinforced frames and hinges contribute significantly to window security.

What is included in a metal window frame?

Each window is equipped with glazing, hinges, a secure lock handle, rubber fittings, and solid burglar bars. We take pride in offering high-quality products with a wide selection of metal window casements to meet your needs. Features and benefits for our Metal Window Frame are as following: Type of color:

What are the different types of aluminium casement windows?

Aluminium casement windows offer versatile designs, including single-hung, double-hung, and awning styles. Configurations range from single panels to multi-panel arrangements, accommodating various architectural needs. Aluminium casement windows offer excellent thermal performance, effectively reducing heat transfer.

How can Sussman architectural products protect stained glass windows?

Sussman Architectural Products can manufacture custom shaped windows to cover, protect and conserve existing stained glass windows and their frame. Protective windows can be vented and shaped to preserve the architectural integrity of the existing stained glass church window.
