What are ehouses used for?

Ehouses are electrical houses used to house electrical equipment,such as switchgear,transformers,circuit breakers,LV panels and other control and protection systems. They are designed to provide a safe and secure environment for the electrical equipment,protecting it from the elements and ensuring safe and efficient operation.

Which industries use E-houses?

For example,industries like oil and gas,mining,and power generationrely on E-houses for efficient electrical system management. Notably,E-houses save time and money with their pre-fabricated design,which reduces labor and material costs. Furthermore,they offer enhanced safety by shielding equipment from harsh environments.
