Our commitment to excellence extends from bustling urban centers to tranquil rural areas, ensuring reliable construction expertise wherever our clients are situated.

What gauge steel is best for a metal building?

The most economical framing option is 14 gauge steel. This gauge measures roughly .0747 inches thick, while 12 gauge steel comes in at 0.1046 inches. 12 gauge steel is often recommended for structures located in regions that experience heavy winds and snows. Steel gauging does affect metal building prices.

Does steel gauging affect metal building prices?

Steel gauging does affect metal building prices. Both gauge options are structurally sound and qualify for certification in most areas. Steel framing is superior to wooden frame structures due to its durability, longevity, and pest resistance. Additionally, steel framing is more customizable than wooden alternatives. Love DIY?
