

Outdoor air conditioner for power distribution housing

What is an outdoor Telecom cabinet enclosure with air conditioner?

The outdoor telecom cabinet enclosure with air conditioner realizes heat absorption and cooling through compression refrigeration, and transfers the heat emitted by the equipment in the cabinet to the outside of the cabinet in a closed environment of the cabinet. Our outdoor Telecom Enclosures are widely used in the area of:

What is the operating range of an outdoor cooling unit?

The operating range has been increased to an outdoor air temperature of up to 46°C. Hot air is discharged from the outdoor unit during cooling operation. Needless to say, if outdoor units are close together, the temperature at the place where the outdoor units have been installed will be higher than the outside temperature.
