

What is an outdoor server rack?

An outdoor server rack or patch cabinet is a 19-inch cabinet that has four 19-inch mounting profiles. In these profiles, you directly attach 19-inch network equipment, such as a rack server, patch panel, switch or ups. The difference between a 'normal' server rack and an outdoor server rack is that the outdoor rack is weatherproof.

How does the outdoor server rack cabinet work?

The cabinet design allows natural wind cooling through filtered vents on the front door and venting under the lip of rain hood. The outdoor server rack cabinet comes 2 or 4 fans with a dust-proof cover located at the top of the cabinet for greater airflow/cooling.

What materials are available for outdoor server rack enclosures?

Outdoor server rack enclosures Material Options: Cold metal Steel, galvanized steel, stainless steel or aluminum steel available. Outdoor electrical cabinet Climate Control options: such as cooling fans, air conditioner, heat exchanger and Thermoelectric Cooler (TEC) available. Monitor door open status inside cabinet and provide real time alarm.
