

Do I need a battery backup for my solar energy system?

Having a battery backup for a solar energy system is important for storing energy when it's needed most. For more information, call Positive Energy Solar.

Who is Hudson solar & battery solutions?

"They were very accommodating and respectful of our needs--probably the best contractors I've had work on our home." Hudson Solar + Battery Solutions empowers energy independence and resilience through premium solar and battery systems.

Do New Mexico utilities charge based on demand?

While most New Mexico utilities do not currently charge rates based on demand levels (known as time-of-use), some utilities in the West and Southwest do, and many expect this to affect New Mexicans in the coming years as utility rates continue to rise and future smart-grid infrastructure is rolled out.

Can a solar panel charge a battery at night?

Solar panels with batteries can charge the battery during the day, when solar production typically exceeds electricity consumption. The battery can then be discharged at night.

At Strive Solar, we specialize in the provision and installation of solar batteries in Santa Fe New Mexico. Our team, composed of skilled and seasoned electricians and solar battery experts, will guide you in ...
