

Outdoor solar battery station refacing lexington

Do I need a solar battery in Lexington?

No, you don't need to install a solar battery in Lexington. Solar panels can operate and lower your electricity bill even without a battery. However, a solar battery might be a worthwhile investment in some cases. A battery can provide backup power and priceless peace of mind in places with prolonged grid blackouts or extreme weather events.

Which company should I choose for solar in Lexington?

Here are the top companies we recommend for solar in Lexington: Eaton is dedicated to ensuring that reliable, efficient and safe power is available when it's needed most. With unparalleled knowledge of electrical power management across industries, experts at Eaton deliver customized, integrated solutions to solve our cu...

How much does a 6 kW solar system cost in Lexington?

A 6 kW solar system will cost about \$14,040 in Lexington before incentives. After the 30% federal solar tax credit, this drops to \$9,828, or about \$1.64 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed, and how you finance it.

What solar incentives are available in Lexington?

The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some cities, counties, states and utility companies offer additional solar incentives, saving homeowners even more money. Here are the solar incentives available in Lexington:
