

Why should you use an outdoor telecom enclosure?

Therefore, using an outdoor telecom enclosure to house these components is vital for their protection. Today's best protection is a NEMA (National Electrical Manufacturers Association) rated telecom box. NEMA 3 or NEMA 4 rated boxes are best for inclement outdoor conditions.

What protections does a box come with?

Our boxes all come standard with the following protections: Marine-grade 5052 aluminum construction for protection against the elements and resistance to rust and corrosion. Universal wall and tower mounting brackets for 360-degree air circulation and cooling. Sunshade for protection against UV rays and excess heat.

Which NEMA rated boxes are best for inclement outdoor conditions?

NEMA 3 or NEMA 4 rated boxes are best for inclement outdoor conditions. NEMA developed scrupulous testing procedures to ensure these telecom enclosures offer enhanced protection from criminal elements and extreme weather conditions such as snow and ice, driving rain, wind-blown debris, and heat.

Why do telecommunication systems need a range protection standard?

The electronics that govern how these systems work are vulnerable to bad weather, falling dirt and debris, and, in some cases, vandalism, so they need an excellent protection standard. The range is a significant factor in maintaining the integrity of telecommunication signals.

QILIPSU Junction Box IP67 Waterproof Plastic Electrical Enclosure Outdoor Weatherproof Project Electric Box with Mounting Plate, Wall Brackets, Hinged Grey Cover 11.2"x7.7"x5.1"; 500+ bought in ...

Our outdoor enclosure is uniquely designed that comes with technical structure with full modularity combination. The enclosure is with IP55 protection rating to EN60529/10.91 Double layer cabinet wall ...

Junction Box, 3.9"x 3.9"x 3" (2 Pack) Outdoor Electrical Box with Mounting Plate, IP67 Dustproof Waterproof ABS Plastic Project Box, DIY Electrical Enclosure Gray (100x 100x 75 mm)
