

What is industrial outdoor storage?

Industrial outdoor storage refers to storage solutions designed for the industrial sector. It can be used for overflow truck parking and storage of various products and materials. Ensuring the security of these products is a top priority. Our gated, secure yards offer best-in-class options for outdoor industrial storage.

What are the different types of outdoor storage facilities?

There are 3 main types of outdoor storage facilities: open outdoor storage, semi-open outdoor storage, and metal canopies. An open-air outdoor warehouse is most often made up of completely uncovered racks. These may be cantilever or pallet racks. However, these racks can also be fitted with canopies or sheet metal cladding on the bottom or sides.

Why is outdoor storage so popular?

It is therefore common to store machinery, vehicles, profiles or raw materials for industry, the timber trade or building materials. That said, given the lack of space in warehouses, more and more professionals are turning to outdoor storage for their heavy, bulky goods.

What is an open-air outdoor warehouse?

An open-air outdoor warehouse is most often made up of completely uncovered racks. These may be cantilever or pallet racks. However, these racks can also be fitted with canopies or sheet metal cladding on the bottom or sides. This type of installation is equally suited to large and small storage volumes. I have a project!
