

Why do architects choose Kingspan insulated metal panels?

Kingspan's insulated metal panels offer aesthetic flexibility with a vast range of exterior panel profiles supported by state-of-the-art specialty fabrications. See why insulated metal panels are the top choice for architects all over the world.

How wide are insulated metal panels?

Commercial insulated metal panels are usually 24 inches to 42 inches in width, while cold storage panels are usually 45 3/8" wide. The exact width will depend on specific product specifications. Are insulated metal panels tested?

What metal building products does SP ACE manufacture?

Browse all of our products, Manufacturing company for the SP.ace range of metal building products, metal strip ceiling, metal louvres, metal grid ceiling and others metal building products.

What are insulated metal panels?

Insulated metal panels are exterior roof and wall panels that are comprised of two pieces of steel skin with insulation foam in the middle. The insulated foam core can range from a variety of material, but the most common options are PUR (polyurethane), PIR (polyisocyanurate), and QuadCore® (self-blended hybrid insulation core).
