

Can I remove a battery from my solar system?

Ask your solar retailer or installer to take away parts of your solar system you no longer need. Do not attempt to uninstall a battery yourself. Most batteries are classified as hazardous waste or as a dangerous good. To stay safe, don't remove, store or transport your old battery.

How do I remove solar panels from my roof?

To remove solar panels from your roof, place a ladder against the side of your house and put on a pair of sturdy gloves before touching or handling any of the solar panels. Some solar panels have contents that are not safe for long-term exposure, so use caution during the removal process. Determine which panels are damaged or not working before proceeding with the removal.

How do I replace the battery in my solar panel?

To replace the battery in an Allsop Home & Garden solar panel, unscrew the screws and separate the two halves of the solar housing compartment. Remove the old battery and replace it with a new rechargeable battery. Insert the screws back into their holes and screw the two halves of the solar housing compartment back to together securely.

What should I do if I don't need a solar panel?

Some states and territories have banned solar panels and other e-waste from landfill. Ask your solar retailer or installer to take away parts of your solar system you no longer need. Do not attempt to uninstall a battery yourself. Most batteries are classified as hazardous waste or as a dangerous good.
