

What is a battery storage rack?

Each battery storage rack unit is designed to allow maximum amount of space, with high product visibility. The result is a higher profit per square foot of retail space. An automotive battery storage rack increases storage density and handling efficiency in the storage of batteries.

What types of battery racks do you offer?

We offer a wide range of battery racks, including seismic-rated, modular, adjustable, and custom-designed racks for both VRLA and flooded battery systems. Our racks are engineered to support reliable performance in utility, telecom, data center, and industrial environments.

Are battery racks UL-listed?

Yes. Many of our battery racks are UL-listed and designed to meet seismic requirements such as UBC Zone 4 and IBC compliance. Be sure to ask about certifications based on your project's regional and regulatory needs. Our racks are primarily constructed from powder-coated steel or stainless steel for strength and corrosion resistance.

What is a battery rack made of?

Made with welded heavy-gauge steel construction, our battery backup cabinets and battery racks are made to last and designed with options to give your facility a unified look. We offer multiple battery racks with different configurations, including both rack mount and cube layout units. Either option can be custom configured.
