

What is an enclosure backplate?

Enclosure backplates are offset from the back of the enclosure allowing electrical devices to be mounted without compromising the integrity or NEMA rating of the enclosure. Most backplates come with pre-cut holes to match the mounting holes in the enclosure.

Does armorlogix have a back plate?

Most weatherproof enclosures from ArmorLogix comes standard with an a blank aluminum back plate, which is used to install electronics on the inside of the cabinet. The equipment plate eliminates the need to compromise the integrity of the NEMA 3 or NEMA 4 enclosure by drilling directly through the enclosure back or side walls.

What are battery housings & intrusion protection plates?

Battery housings and intrusion protection plates safeguard the battery cells, ensure structural integrity, provide sealing, protect against fire, and offer electromagnetic shielding. Plastic-based composite materials make optimal use of space, offer lightweight potential, and combine corrosion resistance with good thermal insulation.

Where are Hoffman backplates located?

Hoffman Backplates for free-stand single and dual access one-door enclosures are 12 gauge painted steel and can be positioned anywhere along the horizontal mounting channels. Half-length back panels can be located in the upper and lower portion of the enclosure.
