

Steel air conditioner for power distribution data rack

What is rack-type precision air conditioner?

Rack-type precision air conditioner is mainly used for nearby cooling of the rack server to embed the air conditioner into the rack. It is highly efficient,energy-saving,safe and reliable,fully meeting the cooling requirements of the rack with intelligent management,compact structure and exquisite workmanship. Energy-efficient.

What is a shenling link rack computer room air conditioner (CRAC)?

The Shenling Link-Rack Computer Room Air Conditioner (CRAC) is an in-rack precision air conditioner that is integrated directly into an individual server rack in a data center. It provides localized,close-coupled cooling,targeting the heat generated by the IT equipment within the same rack,rather than cooling the entire room.

What is a data center air conditioning system?

A data center air conditioning system must always be viewed holistically. Paired with cutting-edge room cooling solutions, the holistic approach enables us to support a vast range of applications, from small computer rooms to enterprise data centers.

What is a Delta M series room cooling system?

Delta M Series Room Cooling System offers a sophisticated solution that complements the growing need for effective air cooling alongside advanced liquid cooling technologies. Delta's L Series room cooling - engineered for superior reliability and efficiency.

Determining heat output of a complete system system is the sum of the heat outputs of the components. The complete system includes the IT equipment, plus other items such as UPS, power distribution, ...

Optimize your equipment cooling with air distribution and cooling offerings for data centers. Explore a variety of solutions designed to maintain optimal temperatures and safeguard your IT infrastructure.

Potential danger Air conditioning equipment is a relatively complex equipment, in the process of installation, operation and maintenance, personnel may have to come into contact with some parts or ...

TEC Air Conditioner for outdoor enclosure cabinet- 200W Air Conditioner-DC powered Metered by outlet with switching rack PDU,Three Phase,400V/32A, (8) C13 outlets 1U Rackmount 4 Port 15.6inch FHD ...

With a strong commitment to innovation, energy efficiency, and intelligent control, Shenling's precision cooling systems are engineered to meet the rigorous demands of 24/7 operation, ensuring stable ...

Steel air conditioner for power distribution data rack

It is highly efficient, energy-saving, safe and reliable, fully meeting the cooling requirements of the rack with intelligent management, compact structure and exquisite workmanship.

In-row precision air conditioner provides robust cooling in a space-saving footprint for small to medium data centers and high-performance computer room.

AZE's 42U outdoor enclosure with 5000W air conditioner is designed to house a variety of telecommunication equipment with 19" or 23" rack rails, standard features that include HVAC climate ...

Rack Air Distribution Options Fan-assisted units help overcome hot spots caused by high-density loads and airflow restrictions due to cabling, piping, and restricted airflow paths within racks and raised ...

Discover a full range of cooling systems for your data center and computer room air conditioning technologies that save energy and water while simplifying deployment.

Uptime Rack ECC13 Product Sheet ECC13 Air Conditioner Uptime Racks ECC13 efficiently cools IT equipment by bringing the cooling directly to the heat source, while using no additional floor space. ...

Deliver low air velocity and even air distribution along the data hall and deliver extremely efficient heat exchange due to reduced internal velocities. Come with an optional heat recovery module and ...

We offer modular and fully scalable cooling solutions provide air distribution and heat removal at rack, row and room level, eliminating hot spots and giving you the most effective performance for the least ...

AZE's 12U outdoor telecom enclosure with 300W air conditioner is designed to house a variety of telecommunication equipment with 19" or 23" rack rails, standard features that include HVAC climate ...
