

Steel battery unit with double door shelves

What is a lithium-ion battery charging cabinet?

The lithium-ion battery charging cabinet is built using all-welded, 18-gauge (1mm) steel and includes a double wall with 1.5" (38mm) of insulating air space to absorb the energy of high temperature battery failures for improved fire safety.

How many receptacles does a lithium-ion battery cabinet have?

This patent-pending design for our lithium-ion battery cabinet offers the highest level of protection. With eight receptacles, it allows for simultaneous charging of multiple batteries up to a maximum of 4kWh, providing a reliable and efficient solution.

What is a battery rack made of?

Made with welded heavy-gauge steel construction, our battery backup cabinets and battery racks are made to last and designed with options to give your facility a unified look. We offer multiple battery racks with different configurations, including both rack mount and cube layout units. Either option can be custom configured.

How much weight can a Li-ion charging cabinet hold?

The safety charging cabinet also comes with one adjustable shelf with a weight capacity of 65 lbs and is approximately 2" thick. An 8-receptacle surge protected power strip is located inside the li-ion cabinet to plug in your charging devices.
