

What is a server rack?

It is designed to support the weight of servers,switches,patch panels,and other equipment,ensuring secure storage and efficient organization. To maintain optimal operating conditions for your equipment,the server rack features ventilation slots that facilitate proper airflow and cooling.

What is an enclosed server rack?

Server Racks that are protected from all four corners are called "enclosed frames." These are available with locks one or two locks on the front,back or both. Because of the extra metal,enclosed frame racks are a bit more expensive and allow less airflow. The walls allow for more cable management,fans and sensor accessories to be mounted.
