

What are the advantages of metal enclosed switchgear?

The grounded metal enclosure also serves as a shield to the internal components thus preventing them from electrical shocks or even fire hazards. One major advantage of metal enclosed switchgear is compactness. This simply means it contains all its elements within one enclosure.

What is a switch & socket box made of?

Made of mild steel with corrosion-resistant epoxy powder coating. Enhance your cable management system with our versatile range of Metal Switch & Socket Boxes. These boxes are made from mild steel and finished with a durable, white epoxy powder coating for optimal corrosion protection.

What is the difference between metal-enclosed and metal-clad switchgear?

Configuration of Enclosures: In a metal-enclosed switchgear, all components are contained in one enclosure; however, for metal clad switchgear, every component has its own compartment.

What are enclosures made of?

Enclosures are made of nonconductive polycarbonate that resists denting, chipping, and cracking. Aluminum enclosures are a lightweight yet durable alternative to stainless steel. These enclosures have thicker walls than standard aluminum enclosures, but are still a lightweight yet durable alternative to stainless steel.
